

QUANTUM Physics

The big things in life
Are made of the little things.

Subatomic particles.
Subatomic attitudes.

Not just words and deeds
But spirit and life.

In nuance and essence
In nature and kind
In motive and intent
Is it Christ's life or mine?

It is not what we do,
but the spirit that it is done in.
We see the shell
God sees the substance.

God (Who is the biggest)
Makes Himself the smallest (Phil. 2).
The Lord of all is consumed with the
Little things of nature and spirit.

The exalted and enthroned King of the Universe
Is a little lamb as though slain.
